The Institution ensures effective curriculum delivery through a well planned and documented process

Mandava Institute of Engineering & Technology is an affiliated college of JNTU, Kakinada and such follows the syllabus set by the parent university. Within these established academic structures, our college attempts to innovate curricular planning and implements effective curriculum delivery providing holistic development for its students. Academic processes are streamlined with the help of University Academic Schedules issued every year, College Academic Plans, Time Tables, Teaching plans and Diaries. We also conduct Orientation Programs providing awareness about faculty and teachers for 1st year students, bridge courses for students of vocational courses and also for students who are lagging in particular subjects.

The teachers regularly and continuously update their knowledge through active involvement in Research and Faculty Development Programs. ICT provides a perfect Complement to our curricular planning, implementation and intellectual teaching. The college provides technologically enabled infrastructure for all students making it possible for all students to engage in an appropriate teaching learning process.

Innovative learning to all students is provided by conducting through internships, projects, and field trips. Majority of the departments of MIET conduct specific Certificate courses, Bridge courses and value added courses etc. for students who require extra knowledge there by augmenting their academic standards.

For all first year students Orientation Programs are organized in the beginning of every year to bring awareness among students about college and hostel premises and faculty. All the students are introduced to their respective faculty members. All the departments prepare Time Tables in the beginning of the semester and all the faculty members strictly adhere to their individual time tables for effective implementation and smooth functioning of class work without any hindrance.

All departments are strictly advised to plan for the conduct of Unit Tests, University Internal Examinations and other co-curricular activities. Departmental reports pertaining to examinations and attendance of students are collected at the end of each semester and the progress of the students is analyzed. Based on the departmental reports, the students are categorized into slow learners and advanced learners.

At MIET supplementing the pursuit of effective curriculum execution is also the effective tutorial and counselling system. The college also facilitates an amalgamation of academic and mental health of our students through the mentor-mentee system where each student is assigned a faculty mentor for academic and extra-academic guidance. The academic and other issues faced by students are suitably addressed through interactions and meetings offered by teachers with students as well as their parents.

Our institution follows an empathetic approach trying to raise the consciousness of our students about how gender-based inequalities, neglect of environmental concerns and lack of ethics hamper an individual's growth. We give top priority for women education and women empowerment.

Even though as an affiliated college, we are restricted in the design of curriculum, we supplement it by providing various employability courses. MIET got MOU with Eduskills who provide placement training and offer internships to MIET.

MIET is a partner of TCS YEP (Youth Employment Program) as part of TCS Corporate Social Responsibility. The TCS trainer trains MBA students on the campus and later provide placements.

Faculty Orientation Program on how to counsel new admitted students
