WHY PROJECT MANAGEMENT?

The project management field is expected to see substantial growth over the next decade, making now a great time to upskill and meet demand. According to the PMI, **employers will need to fill about 2.2 million project-related jobs each year until 2027**. A master's degree in project management can be the key to advancing your career, as it focuses on building the critical project management skills you need to thrive in this industry. These skills can include developing cultural awareness, managing interpersonal conflict, and leading remote teams, among others. According to the PMI, the **median annual salary** of a project manager with PMP certification is **US \$111,000**, as compared to US \$91,000 for non-PMP holders.

They work across a range of industries, including aviation, transport, power generation, and manufacturing.

Average Salary in USA: \$ 74,000-\$1,24,000

THINK OUTSIDE THE BOX!

Why should you get an MS in Project Management degree when you can get an MS degree in your engineering field?

For example, if you have a B.Tech. CSE degree, you already hold the necessary skills to get a job as a programmer. But what you don't have are the skills to become a project manager to climb the ladder in the field of IT and Computer Science. An MS in Project Management degree will help you find a career as a programmer, data analyst, tester or any other IT professional with the skills to become a lead manager of a project.

The demand for project managers is high. The Project Management Institute (PMI®) expects 22 million new project management job openings through 2027. There are plenty of opportunities for advancement. Highly experienced, specialized, certified project managers can expect to see double the entry-level salary—or more. Salaries for project managers in India and abroad are competitive. According to Glassdoor, the US average entry-level project manager salary is \$59,680.

Think outside the box and get a degree in Project Management to advance your career with a globally recognized skill!
